SKILLSEARN

Skills Package, Referral Income & Learning Platform

PROJECT OBJECTIVE

Develop a complete, secure and responsive platform where the owner sells skill-based learning packages. Users can purchase packages, access courses, refer new users and earn direct and generation-wise commissions according to their purchased package and configured eligibility rules.

Platform: Website + User Dashboard + Admin Panel

Important: The Direct Referrer receives direct commission. Generation 1 starts from the Direct Referrer's Upline.

MODULE 1: PACKAGE MANAGEMENT

The admin can create, edit, activate and deactivate packages.

GOLD PACKAGE

- Price: ₹2,000
- Direct Referral Commission: 40%
- Generation 1 Commission: 15%
- Generation Eligibility: 1 Generation
- Course Access: Gold Courses

PLATINUM PACKAGE

- Price: ₹4,000
- Direct Referral Commission: 40%
- Generation 1 Commission: 15%
- Generation 2 Commission: 12%
- Generation Eligibility: 2 Generations
- Course Access: Platinum Courses

DIAMOND PACKAGE

- Price: ₹6,000
- Direct Referral Commission: 40%
- Generation 1 Commission: 15%
- Generation 2 Commission: 12%
- Generation 3 Commission: 8%
- Generation Eligibility: 3 Generations
- Course Access: Diamond Courses

All package prices, commission percentages, course access and eligibility rules must be configurable from the admin panel.

MODULE 2: USER REGISTRATION & LOGIN

Registration Fields

- Full Name
- Email Address
- Mobile Number
- Password
- Select Package
- Referral Code / Referral Link
- Terms & Conditions Acceptance

Login

- User ID / Email / Mobile Number
- Password
- Forgot Password
- Secure Logout

Automatic Setup

After successful registration:

- Generate a unique User ID.
- Generate a unique referral code.
- Generate a personal referral link.
- Save the direct referrer's User ID.
- Create the user's wallet ledger.
- Record the selected package and purchase status.
- Activate the package after verified successful payment.

Prevent self-referrals and duplicate commission processing.

MODULE 3: REFERRAL HIERARCHY — DIRECT, UPLINE & DOWNLINE

Definitions

Direct Referrer: The person whose referral link was used by the new user. This person receives direct referral commission.

Generation 1: The Direct Referrer's Upline.

Generation 2: The Upline above Generation 1.

Generation 3: The Upline above Generation 2.

Downline: Users directly or indirectly registered below a user.

Example Hierarchy

Rahul → Amit → Rohit → Mohan

Assume Mohan purchases a Diamond package for ₹6,000.

Person| Relationship to Mohan
Rohit| Direct Referrer
Amit| Generation 1
Rahul| Generation 2
Rahul's Upline| Generation 3

Rohit receives direct commission. Generation counting starts from Rohit's Upline.

The system must maintain the referral hierarchy and resolve the correct beneficiaries for every purchase.

MODULE 4: DIRECT REFERRAL COMMISSION

The Direct Referrer receives 40% of the eligible package purchase amount.

Formula:

Direct Commission = Eligible Purchase Amount × 40%

Purchased Package| Price| Direct Commission
Gold| ₹2,000| ₹800
Platinum| ₹4,000| ₹1,600
Diamond| ₹6,000| ₹2,400

Rules

1. Direct commission goes to the Direct Referrer.
2. Direct commission is separate from generation commission.
3. Users cannot earn commission on their own purchases.
4. If no valid referrer exists, no direct referral commission is generated.
5. Commission is processed only after verified successful payment.
6. Each purchase is processed only once.

MODULE 5: GENERATION COMMISSION ENGINE

Generation commissions are calculated for the Direct Referrer's Uplines, not the Direct Referrer.

Generation Rates

Generation| Commission Rate
Generation 1| 15%
Generation 2| 12%
Generation 3| 8%

Package-Wise Eligibility

Upline's Active Package| Eligible Generations
Gold| Generation 1
Platinum| Generations 1 and 2
Diamond| Generations 1, 2 and 3

Each beneficiary's package eligibility must be checked independently.

Calculation Rules

Let:

- D = Direct commission generated by the purchase.
- G1 = Generation 1 commission.
- G2 = Generation 2 commission.
- G3 = Generation 3 commission.

Generation 1:

G1 = D × 15%

Generation 2:

G2 = (D × 12%) + (G1 × 15%)

Generation 3:

G3 = (D × 8%) + (G1 × 12%) + (G2 × 15%)

Diamond Purchase Example

Mohan purchases a Diamond package for ₹6,000.

Direct Referrer — Rohit

₹6,000 × 40% = ₹2,400

Generation 1 — Amit

₹2,400 × 15% = ₹360

Generation 2 — Rahul

(₹2,400 × 12%) + (₹360 × 15%)

= ₹288 + ₹54

= ₹342

Generation 3 — Rahul's Upline

(₹2,400 × 8%) + (₹360 × 12%) + (₹342 × 15%)

= ₹192 + ₹43.20 + ₹51.30

= ₹286.50

The system must apply these formulas consistently and credit each eligible beneficiary correctly.

Multiple Downline Purchases

- Process every successful purchase independently.
- Resolve the purchaser's Direct Referrer and successive Uplines.
- Calculate direct and generation commissions.
- Check each beneficiary's package eligibility.
- Record commissions against the originating purchase.
- Prevent duplicate commission credits.
- Do not transfer an ineligible beneficiary's commission to another generation unless an explicitly configured and legally reviewed rule permits it.

MODULE 6: PACKAGE UPGRADE SYSTEM

Users can upgrade to a higher package by paying only the price difference.

Current Package| Upgrade Package| Payable Amount
Gold| Platinum| ₹2,000
Gold| Diamond| ₹4,000

Platinum| Diamond| ₹2,000

Rules

- Upgrade option available in the user dashboard.
- Admin can configure the upgrade eligibility period.
- Display the current package, new package, payable amount and deadline.
- Activate the upgraded package after verified payment.
- Update course access and generation eligibility.
- Preserve original purchase and upgrade payment history.
- Do not generate duplicate commission on the original purchase.
- Admin must configure whether upgrade payments are commissionable and define the applicable commission base.

MODULE 7: USER DASHBOARD

Dashboard Overview

- User ID
- Active Package
- Total Income
- Today's Income
- Weekly Income
- Monthly Income
- Direct Referral Income
- Generation 1 Income
- Generation 2 Income
- Generation 3 Income
- Available Wallet Balance
- Pending Commission

Referral Management

- Personal Referral Link
- Referral Code
- Share on WhatsApp
- Direct Referrals
- Total Downline
- Generation-Wise Members
- Active and Inactive Members
- Member Package Information, subject to access permissions

Financial Management

- Income Statement
- Commission Breakdown

- Purchase History
- Upgrade History
- Wallet Transactions
- Withdrawal Requests
- Withdrawal Status
- Platform Charge Breakdown
- Net Withdrawal Amount
- Downloadable Statements

Account Management

- Profile
- Change Password
- Package Details
- Upgrade Package
- Course Access
- Notifications
- Logout

MODULE 8: WALLET & COMMISSION LEDGER

Every user must have a wallet ledger recording financial transactions.

Transaction Types

- Direct Commission Credit
- Generation Commission Credit
- Withdrawal Hold
- Platform Charge
- Successful Withdrawal
- Failed Withdrawal Release
- Authorized Admin Adjustment

Rules

- Calculate wallet balances from ledger entries.
- Users cannot edit their own wallet balances.
- Each entry must have a unique transaction ID.
- Record the originating purchase, beneficiary, generation and calculation.
- Use database transactions for commission and wallet operations.
- Prevent duplicate commission credits.
- Maintain traceable financial corrections and audit logs.

MODULE 9: WITHDRAWAL MANAGEMENT & 5% PLATFORM CHARGE

A. Withdrawal Schedule — Admin Configurable

The admin panel must provide a withdrawal schedule setting.

Available Options:

- Weekly Withdrawal
- Monthly Withdrawal

The admin can select either option and configure the applicable withdrawal schedule.

Weekly Withdrawal

- Admin configures the withdrawal day.
- Eligible users can submit requests according to the configured schedule.
- Approved requests are paid by the admin.

Monthly Withdrawal

- Admin configures the withdrawal date or monthly processing window.
- Eligible users can submit requests according to the configured schedule.
- Approved requests are paid by the admin.

The selected schedule must be displayed in the user dashboard.

B. User Withdrawal Features

- Enter withdrawal amount.
- Add bank or UPI payout details.
- View minimum withdrawal amount.
- Submit withdrawal request.
- View withdrawal history.
- Track payment status.
- View gross amount, 5% platform charge and net payable amount.

C. Platform Charge Calculation

A 5% platform charge is deducted from the approved gross withdrawal amount at the time of withdrawal.

Formula:

Platform Charge = Gross Withdrawal Amount × 5%

Net Payable Amount = Gross Withdrawal Amount − Platform Charge

Example 1

User requests withdrawal of ₹1,000.

- Gross Withdrawal: ₹1,000
- Platform Charge (5%): ₹50
- Net Amount Payable: ₹950

The admin pays ₹950 to the user.

Example 2

User requests withdrawal of ₹5,000.

- Gross Withdrawal: ₹5,000
- Platform Charge (5%): ₹250
- Net Amount Payable: ₹4,750

The admin pays ₹4,750 to the user.

Example 3

User requests withdrawal of ₹10,000.

- Gross Withdrawal: ₹10,000
- Platform Charge (5%): ₹500
- Net Amount Payable: ₹9,500

The admin pays ₹9,500 to the user.

D. Withdrawal Rules

1. The platform charge is deducted only when processing a withdrawal.
2. The charge is not deducted from the Direct Referrer's or Downline's commission calculation.
3. Commission earnings are recorded at their full calculated amount before withdrawal.
4. The platform charge is calculated on the gross withdrawal amount.
5. The user must see the gross amount, charge and net payable amount before confirming the request.
6. The admin must see the same breakdown in the admin panel.
7. The system must record the charge as a separate ledger transaction.
8. A withdrawal request must not be processed twice.
9. The system must maintain a complete withdrawal audit trail.
10. Any failed payout must be reconciled correctly, with the wallet hold and platform charge handled according to the actual payout outcome.

E. Minimum Withdrawal

- Admin can configure the minimum withdrawal amount.

- The system prevents requests below the configured limit.
- The minimum applies to the gross withdrawal amount unless the admin explicitly configures otherwise.

F. Withdrawal Statuses

- Requested
- Under Review
- Approved
- Processing
- Paid
- Rejected
- Failed

MODULE 10: ADMIN PANEL

A. Dashboard & Reports

- Total Users
- Active Users
- Package-Wise Users
- Total Package Sales
- Verified Payment Amount
- Direct Commissions
- Generation Commissions
- Pending Withdrawals
- Successful Payouts
- Total Platform Charges Collected
- Course Enrolments
- Daily, Weekly and Monthly Reports

B. User Management

- Search and view users.
- View User IDs and referral codes.
- View Direct Referrers, Uplines and Downlines.
- View package and purchase history.
- View commission and wallet statements.
- Suspend or reactivate accounts.

C. Package Management

- Create and edit packages.
- Configure package prices.
- Configure commission rates.
- Configure generation eligibility.

- Configure upgrade rules.
- Manage course access.

D. Referral & Commission Management

- Referral hierarchy viewer.
- Direct referral reports.
- Generation-wise reports.
- Purchase-wise commission breakdown.
- Commission processing status.
- Duplicate commission alerts.
- Fraud monitoring.
- Commission rule change history.

E. Payment Management

- Purchase history.
- Payment gateway transactions.
- Pending and failed payments.
- Payment reconciliation.
- Upgrade payment history.

F. Wallet & Withdrawal Management

- Wallet ledger viewer.
- Withdrawal request management.
- Approve or reject requests.
- View gross withdrawal amount.
- View 5% platform charge.
- View net payable amount.
- Record actual payment reference.
- Handle failed payouts.
- Reconcile wallet holds and payouts.
- Export withdrawal reports.

G. Withdrawal Schedule Settings

The admin can configure:

- Weekly or Monthly Withdrawal.
- Weekly Processing Day.
- Monthly Processing Date.
- Minimum Withdrawal Amount.
- Platform Charge Percentage, default 5%.
- Request Submission Window.
- Withdrawal Processing Status.
- Manual Payout Confirmation.

All schedule and charge changes must be recorded in audit logs.

J. Notifications

- In-app notifications.
- Push notifications.
- Purchase confirmations.
- Package upgrades.
- Commission credits.
- Withdrawal schedule reminders.
- Withdrawal request updates.
- Payment confirmations.
- Admin announcements.

K. Exports & Audit Logs

- Export reports to Excel, CSV or PDF.
- Record commission configuration changes.
- Record user suspension and reactivation.
- Record withdrawal decisions.
- Record financial adjustments.
- Record admin login and security events.
