16 One person's journey

All amounts and percentages shown are the current default settings. The admin can change them from the admin panel.

1 The big picture

SKILLSEARN is a learning platform with a referral reward. A person buys a **skills package**, which unlocks courses. Every member gets a personal **referral link**. When someone joins through that link and buys a package, the member earns **commission** in their wallet, and so do a few people above them. Members can then **withdraw** their wallet money to UPI or a bank account.

There are three parts: the **public website** (anyone can see packages and courses), the **member area** (dashboard, team, income, withdrawals, courses) and the **admin panel** (the company runs everything from here).

2 Packages

Package	Price	Direct income	Generation income you can earn	Courses
Gold	₹2,000	40%	Generation 1 (15%)	Gold courses
Platinum	₹4,000	40%	Generation 1 & 2 (15%, 12%)	Gold + Platinum courses
Diamond	₹6,000	40%	Generation 1, 2 & 3 (15%, 12%, 8%)	All courses

> A higher package does two things: it unlocks more courses, and it lets you earn from **more levels** of your team. Prices, percentages and levels are all set by the admin.

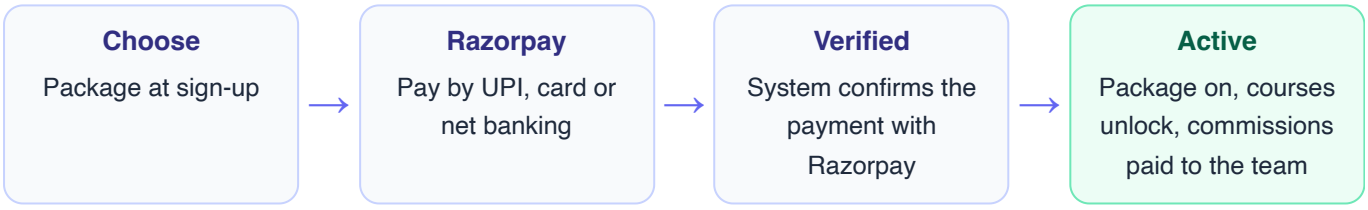

3 Joining & logging in

1. Open the website, or a friend's referral link (the referral code is then filled in automatically).
2. Fill in name, email, mobile number and password, choose a package, and accept the Terms & Conditions.
3. The system creates the account and gives you:
   - a **User ID** such as **SE100013**
   - your own **referral code and link**
   - your place in the team, under the person who referred you
   - an empty **wallet**
4. You go straight to payment for the package you picked.

Logging in: use your **User ID, email or mobile number** with your password. **Forgot password** sends a reset link to your registered email.

> You cannot use your own referral code, and the referral code cannot be changed after joining.

4 Paying for a package

The package is switched on **only after the payment is confirmed**. If a payment fails, the member can simply try again. The same payment can never activate a package twice, and the admin can also check and confirm payments by hand.

5 Your team: who is who

Everyone is placed under the person whose referral link they used. Looking **up** from a buyer:

- **Direct referrer**: the person whose link the buyer used (Rohit).
- **Generation 1**: the direct referrer's referrer (Amit). **Generation 2** is one above that (Rahul), and **Generation 3** one more (Suresh).

In the member area, **My Team** shows everyone below you, level by level, and whether their package is active.

6 Direct referral income

When someone you referred buys a package, you get **40% of that package's price**.

Your referral buys	You receive
Gold ₹2,000	₹800
Platinum ₹4,000	₹1,600
Diamond ₹6,000	₹2,400

You need an active package yourself to receive direct income (admin setting).

7 Generation income

The people above the direct referrer also earn. Their share is worked out from the **direct income (D)**, plus a share of the generation amounts below them:

```
Generation 1 = D × 15%
Generation 2 = D × 12%  +  Generation 1 × 15%
Generation 3 = D × 8%   +  Generation 1 × 12%  +  Generation 2 × 15%
```

> **Each person earns only the levels their own package allows.** A Gold member earns Generation 1 only. A Platinum member earns Generations 1–2. A Diamond member earns Generations 1–3.
> If someone isn't eligible for a level, that amount is **simply not paid**. It is not passed to anyone else.

8 Full worked example

Mohan buys Diamond for ₹6,000 using Rohit's link.

```
Direct (Rohit)  = 6,000 × 40%                                  = ₹2,400.00
Gen 1  (Amit)   = 2,400 × 15%                                  = ₹360.00
Gen 2  (Rahul)  = 2,400 × 12% + 360 × 15%      = 288 + 54        = ₹342.00
Gen 3  (Suresh) = 2,400 × 8%  + 360 × 12% + 342 × 15%
                = 192 + 43.20 + 51.30                           = ₹286.50
```

Everyone here is eligible: Amit is Gold (Gen 1 allowed), Rahul is Platinum (Gen 2 allowed) and Suresh is Diamond (Gen 3 allowed). All four amounts go straight into their wallets, each one gets a notification, and each entry shows exactly how it was calculated.

> **What if Rahul were only Gold?** Gold allows Generation 1 only, so Rahul's ₹342 would not be paid. Suresh would still get his ₹286.50, because his own Diamond package allows Generation 3.

9 Upgrading a package

Gold
already paid ₹2,000

→

Upgrade
pay only the difference

→

Platinum / Diamond
more courses + more generation levels

From → To	You pay
Gold → Platinum	₹2,000
Gold → Diamond	₹4,000
Platinum → Diamond	₹2,000

- Upgrades are allowed within **30 days** of activation (admin setting).
- By default an upgrade **does not create commission** for anyone. The admin can switch that on.
- New benefits apply to **future** earnings only. Past commissions are not recalculated.

10 The wallet

The wallet works like a bank passbook. **Every rupee in or out is a separate entry** with a transaction ID, date and reason. Entries can never be edited or deleted; corrections are made with a new entry. The balance is always the total of all entries.

Money in (+)	Money out (–)
Direct referral commission	Amount held for a withdrawal request
Generation commission	Successful withdrawal (amount sent)
Withdrawal released (rejected/failed request)	Platform charge (5%)
Admin correction (+)	Admin correction (–)

Members see total income, today's income, direct and generation income, amount on hold, and amount withdrawn. They can download their statement.

11 Withdrawing money

The rules (default)

- Requests open **every Monday** (or a monthly date set by admin).
- Minimum amount **₹500**.
- **One request at a time.**
- Paid to **UPI** or a **bank account**.
- **5% platform charge**, taken only when the payout succeeds.

Example: withdraw ₹1,000

Requested (gross)	₹1,000
Platform charge 5%	– ₹50
You receive (net)	**₹950**

The member sees this breakdown and confirms before submitting.

The steps of a withdrawal

Requested ₹1,000 put on hold → **Under review** admin checks → **Approved** → **Processing** money is being sent → **Paid** ₹950 sent, ₹50 charge recorded

Rejected (by admin) or **Failed** (bank/UPI problem) → the full ₹1,000 goes back to the wallet, with **no charge**.

The member gets a notification at every step and can see the status on the Withdrawals page.

12 How the money is sent (Razorpay)

The admin can pay a withdrawal in one of two ways:

Automatic (RazorpayX)

1. Admin opens an approved request and clicks **Pay ₹950**.
2. Razorpay sends the money by UPI or bank transfer (IMPS). Status becomes **Processing**.
3. When the bank confirms, Razorpay tells the system and the request becomes **Paid**, with the bank's reference number (UTR).
4. If the bank rejects it, it becomes **Failed** and the money returns to the wallet automatically.

Manual

1. Admin sends the money from the company's own bank or UPI app.
2. Admin types the transaction reference and clicks **Mark paid**.
3. If it bounces, the admin marks it **Failed** and the money returns to the wallet.

> The same withdrawal can never be paid twice: not by a double click, not by two admins at once, not after a retry.

13 Courses

- Each course is marked Gold, Platinum or Diamond. A member sees every course, and the ones above their package show as **locked**.
- Higher packages include all lower-package courses.
- Lessons are videos or text notes. Members mark lessons complete and see their progress.
- Some lessons can be free previews. The admin adds and edits courses and lessons.

14 What the admin does

Section	Used for
Dashboard	Total and active users, sales, commissions paid, money waiting to be withdrawn, users per package.
Users	Search any member; see their upline and downline, purchases, income and wallet; suspend or reactivate; correct a wallet balance (with a reason).
Payments	See every package payment, check pending or failed ones, confirm by hand if needed.
Commissions	Every commission: who earned it, from which purchase, how it was calculated, and why any was not paid.
Withdrawals	Review, approve, reject and pay requests (automatic or manual).
Wallet ledger	Every wallet entry on the platform.
Packages & rules	Change prices, direct %, generation % and levels, and switch packages on or off. Rate changes apply to new purchases only.
Settings	Withdrawal day, minimum and charge; upgrade window; whether a referral code is required; pause withdrawals.
Announcements	Send a message to all members (shows in their notifications).
Fraud alerts	Warnings about suspicious activity (see section 15).
Audit log	Who changed what, and when.
Reports & exports	Daily, weekly and monthly reports; download lists as spreadsheets (CSV).

15 Safety & fairness rules

- **Money only moves after a confirmed payment.** A package never activates without a payment Razorpay has verified.
- **No double payments.** A purchase can create commissions only once, and a withdrawal can be paid only once.
- **Records can't be edited.** Wallet entries are permanent; mistakes are fixed with a new correcting entry.
- **Fixed placement.** Nobody can refer themselves or change who referred them.
- **Automatic warnings** for the admin: many sign-ups from one place, duplicate payments, payment amount mismatches, and payouts reversed by the bank.
- **Everything is logged.** Every admin action and every login to the admin panel is recorded.

16 One person's journey

When	What happens	Rohit's wallet
Day 1	Rohit joins with Amit's link, picks Gold and pays ₹2,000. Gold is active and his courses open. Amit earns ₹800 (40% of ₹2,000), and the people above Amit earn generation income.	₹0
Day 3	Rohit shares his link on WhatsApp. Mohan joins and buys Diamond (₹6,000). Rohit gets ₹2,400 direct income; Amit +₹360, Rahul +₹342, Suresh +₹286.50.	₹2,400
Monday	The withdrawal window opens. Rohit asks for ₹1,000 to his UPI, and ₹1,000 is put on hold.	₹1,400
Same week	The admin approves and clicks Pay. Razorpay sends ₹950 (₹50 is the 5% charge). Status: Paid, with the bank reference shown.	₹1,400
Later	Rohit upgrades Gold → Platinum by paying the ₹2,000 difference. Platinum courses open, and from now on he can also earn Generation 2 income.	₹1,400
